PROVIDER PORTAL

QUICK START

An easy guide to help you get started

KentuckyOne Health Partners Provider Portal

KentuckyOne Health Partners Provider Portal application compiles information from multiple applications across the system to give you as the provider a user-based and enhanced perspective of your patient population's overall health and activities. The Portal provides you with tools that allow you to view your population's longitudinal medical records, referral data, enrollment information, as well as statistics and metrics aggregated from their claims data and clinical events.

Additionally, the Provider Portal is a platform that allows providers to collaborate with their population in an organized and detailed manner. The Portal grants them access to a variety of functionality as illustrated below:

View Information for Patients You have Treated

The Patient Lookup portion of the Provider Portal application gives you an overview of your population and allows you to view patients by your practice, all patients you have treated and/or those patients who are attributed to you.

Patient Lookup ?

Show me Results for: PCP | My Patients | My Practice | All Enrollees Lookback: 1 Year ▼
